D-Link®

Product Highlights

Flexible Networking Options
- 8, 24 or 48 x 10/100/1000BASE-T ports
- 2 x SFP or 4 x RJ45/SFP COMBO ports
- PoE+ (802.3at) support on select models

Easy Management
- Multilingual Web UI, compact CLI, SNMPv1/v2c/v3, and a variety of management features
- Surveillance Mode UI - optional user interface simplifies surveillance network configuration and maintenance

IPv6 Ready
- Fully IPv6 compatible and ready for future addressing standards

DGS-1210 Series

Gigabit Smart Managed Switches

Features

Security Features
- Access Control Lists (ACLs)
- D-Link Safeguard Engine helps protect the CPU from broadcast/multicast/unicast flooding
- Port Security supports up to 64 MAC addresses per port
- ARP Spoofing Prevention
- Smart IP-MAC-Port Binding
- DHCP Server Screening

Intuitive Management Options
- Web-based Graphical User Interface - Standard Mode or Surveillance Mode
- D-Link Network Assistant Utility
- Simplified CLI through Telnet
- Built-in SNMP MIB for remote NMS (D-View 7.0)

Advanced Features
- Static Route
- Auto Voice VLAN
- Dual software images
- Dual configuration files

Green Technology
- Link status detection
- Port shut-off
- System hibernation
- Time-based PoE (PoE models only)

Overview

The D-Link DGS-1210 Series Smart Managed Switches are the latest generation of switches to provide increased Power over Ethernet (PoE) output, a range of physical interface types, multiple management interfaces, and advanced Layer 2 features. With all of these features combined, the DGS-1210 Series helps provide a cost-efficient and flexible solution for expanding any business network.

The DGS-1210 Series switches support 8, 24, or 48 10/100/1000BASE-T ports. Each switch also supports an additional 2 or 4 Gigabit SFP ports for optical connections using multimode or singlemode SFP transceivers.

PoE Support

Five of the nine models in the DGS-1210 series family support Power-over-Ethernet capabilities, simplifying deployments with IP cameras, VoIP phones, wireless access points, and other powered devices. These models include the DGS-1210-10P, DGS-1210-10MP, DGS-1210-28P, DGS-1210-28MP and DGS-1210-52MP. Using the switch's management interface, an administrator can control various PoE functions, such as remotely rebooting cameras or access points, from anywhere on the network, including over the Internet.

The switches also support time-based PoE – an option that allows administrators to set a time window that determines when each port's PoE power is turned on and off. All PoE models support the IEEE 802.3af and 802.3at standards, and each PoE power budget varies per model.

Advanced Features

The DGS-1210 Series comes equipped with a complete lineup of L2 features, including IGMP snooping, port mirroring, Spanning Tree Protocol (STP), and Link Aggregation Control Protocol (LACP). The IEEE 802.3x Flow Control function allows servers to directly connect to the switch for fast, reliable data transfers.

The DGS-1210 Series also supports advanced features such as static routing, With static routing, IP routes are manually entered into a routing table, which allows for communication between different user groups in different VLAN segments in a network. The switch can directly handle inter VLAN routing using multiple interfaces, making the network run faster and more efficiently. Because the switches can manage internal routing, the network router can be assigned to handle external traffic routing only.

Network maintenance features include loopback detection and cable diagnostics. Loopback detection significantly speeds up troubleshooting by automatically detecting and shutting down switching loops. The cable diagnostics feature, designed primarily for administrators and customer service representatives, determines the cable quality and quickly discovers errors.

Automatic Configuration

The DGS-1210 Series supports Auto Voice VLAN and Surveillance Mode, which allow voice and video traffic to be automatically identified and handled differently to regular network traffic. Auto Voice VLAN detects Voice over IP (VoIP) traffic and automatically segments it from the rest of the network, helping to increase security and allow Quality of Service (QoS) to be applied.

Surveillance Mode detects compatible ONVIF cameras and places them in a surveillance VLAN, allowing a single switch to be used for voice, video, and data, removing the need for dedicated hardware and reducing maintenance costs. Surveillance Mode also includes its own Web UI, making surveillance features easily accessible and simplifying management of your surveillance network.

Network Security Features

D-Link's innovative Safeguard Engine helps protect the switches against traffic flooding caused by malicious attacks. The DGS-1210 Series supports 802.1X port-based authentication, allowing the network to be authenticated through external RADIUS servers. The Access Control List (ACL) feature helps enhance network security and helps to protect the internal IT network. The DGS-1210 Series also features Address Resolution Protocol (ARP) spoofing prevention, which helps provide protection from attacks on the network that could allow an intruder to sniff data frames, modify traffic, or bring traffic to a halt altogether by sending fake ARP messages. To help prevent ARP spoofing attacks, the switch uses packet control ACLs to help block invalid packets that contain fake ARP messages. For added security, the DHCP server screening feature filters DHCP replies on unauthorized ports to help prevent them from being assigned an IP address.

Versatile Management

The DGS-1210 Series comes with the D-Link Network Assistant (DNA) utility that enables administrators to remotely control their network down to the port level. The D-Link Network Assistant utility furthermore allows customers to easily discover multiple D-Link Smart Managed Switches within the same L2 network segment and display them on-screen for instant access. With this utility, users do not need to change the IP address of their PC. This allows for simultaneous configuration and basic setup of all discovered devices, including password changes and firmware upgrades.

The DGS-1210 Series also supports D-View 7.0 and Command Line Interface (CLI) through Telnet. D-View 7.0 is a network management system that allows for the central management of critical network characteristics such as availability, reliability, resilience, and security.
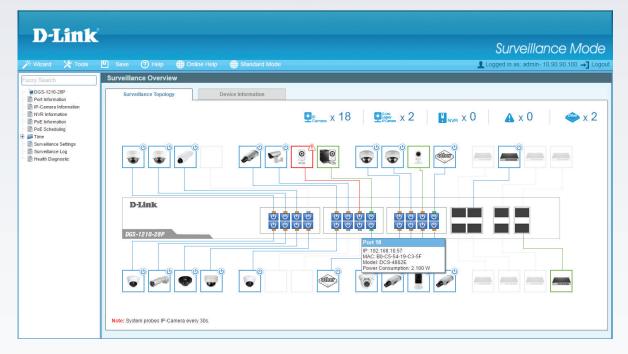

Lifetime Warranty and NBD Replacement

D-Link offers a Lifetime Warranty and Next Business Day (NBD) hardware replacement on the DGS-1210 Series Gigabit Smart Managed Switches to further its commitment to product quality and long-term customer confidence.[1]

	TLS v1.0
	DoS attack prevention
	802.1X Port-based Access Control
	Port Security
	 • Supports up to 64 MAC addresses per port
	ARP Spoofing Prevention
	 • Max. 127 entries
		DHCP Server Screening
		IP-MAC-Port Binding (Smart Binding)
		 • ARP Inspection
		  • Max. 256 entries
		 • IPv4 Inspection
		  • Max. 127 entries
		 • IPv6 Inspection
		  • Max. 63 entries
		 • DHCP Snooping
		  • Max. 512 entries

AAA	802.1X Authentication • Supports local/RADIUS database • Supports port-based access control • Supports EAP, OTP, TLS, TTLS, PEAP • Max. 128 entries when using local database	IPv6 RADIUS server Support MD5 authentication
OAM	Cable diagnostics	Factory reset
Management	Web-based GUI D-Link Network Assistant Utility Compact CLI Telnet Server TFTP Client Configurable MDI/MDIX SNMP • Supports v1/v2c/v3 SNMP Trap Backup/upgrade firmware Smart Wizard Upload/download configuration file BootP/DHCP Client	System Log • Max. 500 log entries SNTP ICMP v6 IPv4/v6 Dual Stack DHCP Auto Configuration Time setting • SNTP RMONv1 Trusted host Dual image Dual configuration
Green v3.0 Technology	Power Saving by: • Link Status • Time-based PoE: PoE ports can be turned on/off by port or system through schedule	System hibernation Port shut off Cable length detection
MIBs	• RFC1212 Concise MIB Definitions • RFC1213 MIBII • RFC1215 MIB Traps Convention • RFC1493 Bridge MIB • RFC1157, RFC2573, RFC2575, RFC2576 SNMP MIB • RFC1442, RFC1901, RFC1902, RFC1903, RFC1904, RFC1905, FC1906, RFC1907, RFC1908, RFC2578, RFC3418 SNMPv2 MIB • RFC271, RFC1757, RFC2819 RMON MIB • RFC2021 RMONv2 MIB • RFC1398, RFC1643, RFC1650, RFC2358, RFC2665 Ether-like MIB	• RFC2674 802.1p MIB • Interface Group MIB • RFC2618 RADIUS Authentication Client MIB • RFC4022 MIB for TCP • RFC4113 MIB for UDP • RFC2389 MIB for Diffserv. • RFC2620 RADIUS Accounting Client MIB • Private MIB • PoE MIB • DDP MIB • LLDP-MED MIB
RFC Standards	• RFC791 IP • RFC768 UDP • RFC793 TCP • RFC792 ICMPv4 • RFC2463, RFC4443 ICMPv6 • RFC826 ARP • RFC1321, RFC2284, RFC2865, RFC2716, RFC3580 Extensible Authentication Protocol (EAP)	• RFC2573 SNMP Applications • RFC2461, RFC4861 Neighbor Discovery for IPv6 • RFC2462, RFC4862 IPv6 Stateless Address Auto-configuration (SLAAC) • RFC2464 IPv6 over Ethernet and definition • RFC4291 IPv6 Addressing Architecture • RFC2893, RFC4213 IPv4/IPv6 dual stack function

Ordering Information

Product	Description	Warranty
DGS-1210-10	8 10/100/1000BASE-T and 2 1G SFP Ports L2+ Smart Managed Switch	Lifetime[1]
DGS-1210-10P	8 10/100/1000BASE-T PoE and 2 1G SFP Ports L2+ Smart Managed Switch, 65W PoE Budget	Lifetime[1]
DGS-1210-10MP	8 10/100/1000BASE-T PoE and 2 1G SFP Ports L2+ Smart Managed Switch, 130W PoE Budget	Lifetime[1]
DGS-1210-26	24 10/100/1000BASE-T and 2 1G SFP Ports L2+ Smart Managed Switch	Lifetime[1]
DGS-1210-28	24 10/100/1000BASE-T and 4 1G RJ45/SFP COMBO Ports L2+ Smart Managed Switch	Lifetime[1]
DGS-1210-28P	24 10/100/1000BASE-T PoE and 4 1G RJ45/SFP COMBO Ports L2+ Smart Managed Switch, 193W PoE Budget	Lifetime[1]
DGS-1210-28MP	24 10/100/1000BASE-T PoE and 4 1G RJ45/SFP COMBO Ports L2+ Smart Managed Switch, 370W PoE Budget	Lifetime[1]
DGS-1210-52	48 10/100/1000BASE-T and 4 1G RJ45/SFP COMBO Ports L2+ Smart Managed Switch	Lifetime[1]
DGS-1210-52MP	48 10/100/1000BASE-T PoE and 4 1G RJ45/SFP COMBO Ports L2+ Smart Managed Switch, 370W PoE Budget	Lifetime[1]

Optional 1 Gbps SFP Transceivers

DGS-712	1000BASE-T SFP Transceiver	
DEM-310GT	1000BASE-LX SFP Transceiver, Single-mode	
DEM-311GT	1000BASE-SX SFP Transceiver, Multimode	

[1] Lifetime Warranty available in U.S.A. only. Lifetime Warranty is effective for products purchased on or after Aug 1, 2017. Products purchased prior to Aug 1, 2017 are covered by Limited Lifetime Warranty. Lifetime Warranty void when not purchased from Authorized US D-Link Reseller. Please visit us.dlink.com for list of Authorized US Resellers.
